

My name is Regina Gashi and I would like to share a little about myself and my professional and personal journey.

I am a seasoned accounting and consolidations professional who has been working in the agricultural and foods industry for over two decades. Throughout my career, I have developed a reputation for being highly skilled, efficient, and reliable. I have gained extensive experience working with a range of financial software systems, specifically in the CPM realm, including Oracle and OneStream solutions.

Recognizing the importance of staying up to date with the latest technologies, I have decided to take a coding class with MIT. I wanted to enhance my coding skills in HTML and JavaScript so that she could leverage these skills in my work with financial software systems. My dedication to learning new skills paid off quickly as I was able to create custom reports and dashboards that are tailored to the specific needs of our internal customers.

Outside of work, I am a devoted mother to a seven-year-old daughter. I believe in leading by example and have taken on the role of troop leader for my daughter's Girl Scouts daisy troop. I enjoy sharing knowledge and skills with the young girls and feel that this role has helped me develop my leadership skills even further.

My passion for work and commitment to continuous learning make me an asset to any team. I am a dedicated professional who is always looking for ways to improve my skills and stay ahead of the curve in my field. My leadership and mentoring skills make me a role model for some newer colleagues and the young girls in my Girl Scouts Troop.

I look forward to continuous growth in my current career and new opportunities for professional development along side with personal time for home and family.
